“ONLINE HOSTEL MANAGEMENT SYSTEM” is software developed for managing various activities in the hostel. For the past few years the number of educational institutions is increasing rapidly. Thereby the number of hostels is also increasing for the accommodation of the students studying in this institution. And hence there is a lot of strain on the person who are running the hostel and software’s are not usually used in this context. This particular project deals with the problems on managing a hostel and avoids the problems which occur when carried manually. Identification of the drawbacks of the existing system leads to the designing of computerized system that will be compatible to the existing system with the system which is more user friendly and more GUI oriented.

Php, Javascript, HTML, CSS, MySQL

Projects

2019 **Online Hostel Management**

This system is designed in favour of the hostel management which helps them to save the records of the students about their rooms and other things.

2020 **Reminder application for notification**

Reminder application for notification like meetings or drinking water

Achievement

- Won FIRST PRIZE in a competition held in college named “Best Out of Waste”.
- Won FIRST PRIZE in making posters.
